

About the example file

This is manually edited and generated with use of XMLSpy. The "n1:" is only present because XMLSpy defines the namespace like this in this example. XML elements should be shown without the use of "n1:" The schemaLocation is not of importance in this example.

This is an example file to help development and must not be interpreted to show complete content requirements of data. For example are the elements for ChangeFloat intentionally set to 0.00

Overview of codes used

Basics
